|   |                   |                            | Cut here for | r 5908 template           |
|   |                   |                            |              |                           |
|   |                   | J and 5908                 |              |                           |
| INSTALLATION INSTRUCTION FOR UNDERMOUNT SINK.   |                   |                            |              |                           |
| 1. Inspect sink for damage and dimensional compatibility. Do not attempt to install a damaged sink.   |                   |                            |              |                           |
| 2. Undermount sinks are designed for use with solid surface benchtops, examples as follows;   |                   |                            |              |                           |
| -Natural Stone eg. Marble, Quartz etc   |                   |                            |              |                           |
| -Engineered stone eg. CaesarStone, Silestone etc  |                   |                            |              |                           |
| -Acrylic solid surfaces eg. Corian, Freestyle, Staron etc   |                   |                            |              |                           |
| It is not recommended that undermount sinks be fitted to laminate benchtops.  |                   |                            |              |                           |
| Contact your benchtop supplier to establish the type of material used. Your supplier should recommend a suitable adhesive and sealant for the specified       |                   |                            |              |                           |
| material.   |                   |                            |              |                           |
| 3. Using the cut-out template mark the exact location of the required cut-out in the benchtop. Ensure that the tap location is suitable. Ensure that the supp |                   |                            |              |                           |
| cut-out gives the desired fit.  |                   |                            |              |                           |
| 4. Using the appropriate tools and safety equipment cut the benchtop as marked out.   |                   |                            |              |                           |
| 5. Mask the sink and the cut-out to avoid sealant/epoxy overspill onto finished surfaces.   |                   |                            |              |                           |
| 6. Apply the recommended sealant at the edge of the join between sink and benchtop.   |                   |                            |              |                           |
| 7. Apply the recommended adhesive as directed by adhesive supplier.   |                   |                            |              |                           |
| 8. Position the sink in the desired final location and clamp to the benchtop.   |                   |                            |              |                           |
| 9. Promptly remove excess sealant from benchtop and sink using a recommended clean up solvent suitable for your benchtop material and stainless stee          |                   |                            |              |                           |
| 10.When the installation has cured for the recommended period check that the seal is watertight and the attachment is secure.                                 |                   |                            |              |                           |
